The catalogues of the selected libraries inspected by Richard Pfloderer include good quality colour illustrations of each separate chart and a representative sheet from each atlas. In most cases the place-names can be read. The libraries in question are Chicago (Newberry Library), Florence (Archivo di Stato), Greenwich (National Maritime Museum), Oxford (Bodleian Library), San Marino (Huntington Library). However, this does not apply to the British Library. Those illustrations are *not* listed below.
